DEFINITION
The Senior Fire Mechanic plans, organizes, supervises and participates in the work of the Department’s fleet operations, and performs the more difficult and highly responsible mechanical work.

This classification is a Fair Labor Standards Act non-exempt, represented position in the Classified Service.

DISTINGUISHING CHARACTERISTICS
This classification is distinguished from the next lower classification of Fire Mechanic II in that Senior Mechanic duties involve supervision of the Department’s fleet operations.

EXAMPLES OF DUTIES
Depending upon assignment duties include, but are not limited to the following:

- Supervise and participate in the overall day-to-day work performed by the Department Shop, including the maintenance, repair and overhaul of fire apparatus and equipment to ensure readiness for emergency operation.

- Schedule required service and maintenance and coordinate emergency repairs.

- May establish service priorities based on Department needs, assign work and inspect repair work.

- Assist in the design and preparation of apparatus and equipment specifications such as lighting, Code 3 systems, GPS systems, communication systems and traffic control devices.

- Participate in training fire suppression personnel in proper apparatus and equipment operation and maintenance.

- Supervise annual apparatus and vehicle tests, including testing of new and recently repaired apparatus and vehicles.

- Train Shop personnel in the use of testing equipment to troubleshoot maintenance and repair work.

- May make recommendations on personnel matters such as training, skill improvement and development, including discipline.

- Coordinate and supervise periodic inspections of equipment and apparatus at fire stations.

- Estimate cost of repairs, and make recommendations on whether to repair or replace equipment.

- Purchase tools and materials necessary for the repair of the Department’s fleet.
EXAMPLES OF DUTIES (continued)

- Maintain a list of suppliers to be used for obtaining parts, and maintain an inventory control system of Shop tools, parts and supplies.
- Maintain records, make reports and make recommendations on the Shop budget.
- May represent the Department on inter-agency committees and in other cooperative programs.

EMPLOYMENT STANDARDS

Education and Experience: Graduation from high school or passing the General Education Development (GED) test and equivalent to the completion of an associate degree and four (4) years of journey-level experience. Experience must include the maintenance of diesel engines, heavy trucks and/or fire apparatus. A minimum of one (1) year supervisory experience or three (3) years of working in a lead capacity.

Or

Graduation from high school or passing the General Education Development (GED) and graduation from a recognized trade school on automotive mechanic and four (4) years of experience as a journey-level mechanic. Experience must include the maintenance of diesel engines, heavy trucks and/or fire apparatus. A minimum of one (1) year supervisory experience or three (3) years of working in a lead capacity.

Or

Graduation from high school or passing the General Education Development (GED) and eight (8) years of experience as a journey-level mechanic. Experience must include the maintenance of diesel engines, heavy trucks and/or fire apparatus. A minimum of one (1) year supervisory experience or three years of working in a lead capacity.

As a condition of employment, must acquire and maintain the State Fire Marshal Fire Mechanic II Certificate within four (4) years of employment. Thereafter, the incumbent must acquire the State Fire Marshal Fire Mechanic III Certificate.
