

Zoll X Series Cardiac Monitors July 2015

County Fire has Zoll X Series cardiac monitors that will monitor vital signs, amount of carbon monoxide in the blood stream, oxygen saturation for patients who have difficulty breathing, and when an acute MI is detected (heart attack) has 97% accuracy for the 12 lead diagnosis.

These monitors can connect with local hospitals. Doctors will be notified of cardiac patient's condition and can prepare for the cardiac patient before the ambulance arrives at the hospital.

Firefighters have been trained on the functions of these awesome monitors!
