

Is Your Home Prepared for Wildfire?

Join Us! Learn how to reduce wildfire risks in the Home Ignition Zone (HIZ)

Presented by:

Breakthrough research has shown the majority of homes lost to wildfire are first ignited by embers and small flames. Take steps to harden your home in the Home Ignition Zone (HIZ) to better protect it from the threat of wildfire.

The HIZ includes three sub-zones:

- **Immediate Zone 1 (0' to 5')**
- **Intermediate Zone 2 (5' to 30')**
- **Extended Zone 3 (30' to 100')**

This webinar will focus on making your home more wildfire resistant in the immediate area surrounding your home (0' to 5') and the area most vulnerable to embers and the effects of radiant heat.
